A.2 — PYQ-book-only facts (not verified against the raw extraction's Parmar/Lucent text)

- Manipuri's revival credited to Rabindranath Tagore (via Shantiniketan) — the raw extraction's own trick-sentence exponent lists do not name Tagore as reviver.
- Sattriya "Sattras" derivation and 15th-century dating as printed in the PYQ explanations match the raw extraction's Founder = Srimanta Sankaradeva; kept as corroborating, not contradicting.
- Chhau's UNESCO/UNICEF "cultural heritage" recognition (as opposed to formal Representative List membership) is the PYQ book's own framing — flagged as a doubt in §5 above.
- Odissi's two foundational postures, Chauka and Tribhanga, are named only in the PYQ book's explanations — the raw extraction lists Odissi's elements (Mangalacharan, Batu Nritya, Pallavi, Tharijham, Moksha) but not these two posture names.
- Sattriya's origin from Assam's "Sattras" (Vaishnav monasteries) is the PYQ book's own term — not named as such in the raw extraction (which discusses Sattriya only via its exponents).
- Kalaripayattu's sword "Urumi" and Thang-Ta's alternate name "Huyen Langlon" are PYQ-book-only terms — the raw extraction's martial-art-dances table (Part C) names the dances but not these implement/alternate names.
- Hojagiri's community named "Reang" in the PYQ book vs. Parmar's Part B spelling "Bru Reang"; Garia's "Tripuri & Jamatia tribes" and its "Poanglum" pairing (borrowed from the Chang Lo entry above it in the PYQ text) are PYQ-book-only — not in the raw extraction's Tripura table (B.26), which lists Garia only as "performed during the harvest festival (Spring season)" with no named community.

A.3 — Doubts carried forward from the raw extraction

Same-name dances across multiple states (Karma, Paika, Saila, Jhumar/Jhumur/Jhumair, Maruni, Cheraw) — see §4. West Bengal "Rabha war" printed as "West Bengal and West Bengal" (printing slip, raw extraction B.29) — not tested in this PYQ set, not resolved. Haka attributed by Parmar to "Samoa tribe near New Zealand" (raw extraction Part D) — likely should be Māori — not tested here, not resolved.
